VISITOR MANAGEMENT SMART VISITOR JOURNEYS

Any visitor to your facilities takes a journey into your company's world. Yardi Bluepoint embraces the latest cloud technology which, when coupled with sleek kiosks, eliminates queues, enhances security and creates the right impression.

Imagine no more visitor queues at reception. Yardi Bluepoint allows you to transform the visitor journey. Staff can make appointments anywhere, any time, with no worries about integration. Invites can be sent, and credentials issued, using standard office systems. Staff and visitors alike work with familiar programs for total ease of use. All preliminary security and health & safety checks can be carried out before arrival to save time. On arrival, visitors check in using their email invite or by scanning a unique QR code on their mobile phone. If a physical pass is desired, reception can produce a printed pass, self-expiring visitor label or access card.

Yardi Bluepoint lets you monitor who is in your building at any one time. Staff and visitor details are stored safely in the cloud. The dashboard provides a dynamic overview, with a view of total visitors, whether they are planned or unplanned, peak visitor flows and more, allowing you to optimise your resources. Beyond visitor management, Yardi Bluepoint can integrate through APIs to passport scanners and existing access control systems.

- ✓ Cloud-based visitor management solution
- ✓ Quick and easy to deploy
- ✓ Seamless visitor experience
- ✓ Multi-tenant ready

SELF CHECK-IN KIOSKS

Databac offers both desktop and free-standing kiosks which allow your guests to log in using their QR code and then issue their visitor pass or access card. Kiosks can be made to measure and incorporate various components to suit your needs. They can include a touch screen protected by an anti-microbial cover, so that the user can add data if required.

Ticket and label printers can be included, as well as card printers to issue physical cards. Optional ID cameras and passport/driving licence scanners allow rapid capture of necessary data.

COMPLETE ID SOLUTIONS PHYSICAL AND DIGITAL

As an ID security manufacturer, Databac can provide custom ID cards and visitor labels incorporating a choice of technologies. We also offer a wide range of products to allow you wear, store and display them visibly and securely, such as branded lanyards, badge holders and clips. Our anti-microbial and eco-friendly products are ideal for use for visitor management.
